INT Weekly Meeting

2012-02-12

INT JIRA Plan

- Challenge: action items cross projects
  - Approach:
    - INT to create Epics in INT project,
    - INT identified identified action items (stories/tasks/bugs) can be either under INT or dev projects, with Epic link pointing to INT epic
    - Dev project identified work items under project own management
      - Prefer to use INT Epic
- JIRA work-flow
- End of Sprint demos
  - Knowledge transfer opportunity for INT to learn from dev projects how to deploy, run, and test.
