Operations and Maintenance

Scope

The O-RAN-OAM-interface specification defines

- a NETCONF-Server for Configuration Management (CM) and
- a http-client for Fault Management (FM), Performance Management (PM) and other events

on each Management-Service-Provider (MnS-Provider) running on the ManagedElement (ME).

The O-RAN-SC-OAM project provides reference implementation according to the O-RAN OAM (WG1) documents. In addition we provide a common MnS-Consumer for development and module test purposes. The assumption is that the projects for the ManagedElements can concentrate on the more important user-plane.

Of course each project needs its own OAM repo to address the specific needs of the ManagedElement.

Mailing list and #oam

We use main@lists.o-ran-sc.org with hashtag "#oam" in the subject of emails.

Please make sure that you add somewhere in the subject of your email "#oam".

Example subject: "#oam Please help!"

More examples: https://lists.o-ran-sc.org/g/main/search?q=%23oam&ct=1

O-RAN-SC members who are not interested in OAM email conversations can mute the hashtag "#oam": https://lists.o-ran-sc.org/g/main/hashtags
