

NONRTRIC: Requirements

We have created a draft discussion document to capture requirements for the LF OSC Non Real-Time RIC implementation. It is expected that some of these requirements will not be met in initial releases but we will continue to work towards them.

Requirements for individual releases will be curated and maintained by the [Requirements and Software Architecture Committee](#)

This is a living document so please make suggestions about how we can firm up the requirements and so help define the scope of the project.

- 25 July 2019: Draft: Based on Initial discussions between AT&T and Ericsson - Further input/discussion required from O-RAN WG2 and all partners.
 - [NonRTRIC-requirements-draft-20190125.docx](#)

Live Epics/Requirements

Key	Summary	T	Created	Updated	Due	Assignee	Reporter	P	Status	Resolution
