NONRTRIC (John Keeney)

- As per last week:
    - Initial proposals for J Release are ongoing:
        - Tentative headline goals:
            - Continue work on rApp Manager - as a focal point for tying together alot of other existing activities
                - Working on some sample rApps. e.g. See Release J: Simple rApp using Hello World Microservice
            - Continue work on Service Manager - again pulling together alot of work on Service Exposure in previous releases
                - may be able to get an early alpha version released at I Maintenance Release time - running out of time on this.
            - Continue maturing the A1-Policy Controller function (ref ONAP) - including a potential new NBI (v3) to achieve R1 alignment

- May need to de-prioritise some of the older less-used NONRTRIC functions - we welcome others in the community to help take these on if interested.
- Need to study how/if we can achieve R1-DME alignment. Specs continue to diverge from our implementation - with alot of effort need to align. We welcome contributors to help here.
  - Maintenance I-Release
    - Running out of time ....
      - Still have an issue with A1 compatibility between A1-PMS and near-RT-RIC A1 Mediator. Hoping to make progress & fix together with A1-Mediator team for Maintenance Release.
        - **NONRTRIC-939** - Getting issue details... STATUS
        - **RIC-999** - Getting issue details... STATUS
        - **RIC-1031** - Getting issue details... STATUS
      - Maybe Service Manager - TBC
    - We may not be able to make the Maintenance Release Deadline. Will know more by TOC call on Thursday
  - Working through reviews for changes to it/dep charts. Main focus on A1-PMS configuration functionality & state. Still verifying
    - Very close to ready to merge now. Further changes will be needed later (e.g. A1 controllers across ONAP & OSC etc).
