Review plan in Jira of J Release:

- J Release - Releases - Confluence (o-ran-sc.org)
- [INF-441] [MultiOCloud] Develop OKD as alternative O-Cloud platform - ORAN Jira (o-ran-sc.org)
  - Reviewed and Questions:
    - Only automated deployment scripts will be contributed to the INF project?
    - How about the source code of OKD and build scripts or steps for OKD? Can we build OKD images from source code in INF?
    - If the deployment scripts only pull binary images from OKD community, how can we say it's another open source implementation of O-Cloud in ORAN-SC?
- [INF-442] [O2] Update O2 implementation to aligned with new Spec Ver 5.0 - ORAN Jira (o-ran-sc.org)
- [INF-443] [MultiOS] Update INF Platform to aligned with StarlingX 9.0 - ORAN Jira (o-ran-sc.org)
- Keep working on the integration with ETSI DMS by NTT.

Action Items:

- WindRiver:
  - Went through all the Jira issues and refine as needed.
- Redhat:
  - Discuss internally about the scope of the contribution efforts.
