### NONRTRIC (John Keeney)

- **Announce** a first version of our Service Manager function
  - Documentation is very light still, and deployment/integration/tests need more work
  - Docker: o-ran-sc/nonrtric-plt-servicemanager https://nexus3.o-ran-sc.org/#browse/browse:docker.staging:v2%2Fo-ran-sc%2Fnonrtric-plt-servicemanager%2Ftags%2F0.1.0
  - JIRA: **NONRTRIC-944** - Getting issue details... `STATUS`
  - Lots still to do!
- Otherwise Continuing tasks as mentioned last week.
  Making Good Progress
- Last Week
  - Continue work on rApp Manager - as a focal point for tying together alot of other existing activities
    - Working on some sample rApps. e.g. See Release J: Simple rApp using Hello World Microservice
    - Aim to have an updated version in coming weeks
  - Continue work on Service Manager - again pulling together alot of work on Service Exposure in previous releases
  - Continue maturing the A1-Policy Controller function (ref ONAP) - including a potential new NBI (v3) to achieve R1 alignment
    - Current API will be maintained but deprecated for several releases to come.
    - New API development ongoing
  - Will need to de-prioritise many of the older less-used NONRTRIC functions - we welcome others in the community to help take these on if interested.
    - Need to study how/if we can achieve R1-DME alignment. Specs continue to diverge from our implementation - with alot of effort need to align. We welcome contributors to help here.
  - Working through reviews for changes to it/dep charts. Main focus on A1-PMS configuration functionality & state.
    - Latest updates merged (Release I). Still verifying. Good progress
