Passcode: %.1KI?Ux

Status update:

- Prepare an update for TSC co-chairs.
 - Overview of the project: e.g. # of releases so far, # of committers, which companies, # of lines of code, which companies are the most active etc....
 - Compared to the architecture/functionalities defined in O-RAN spec., what functionalities/entities/interfaces have been implemented? Which spec. version are they corresponding to? What are missing? why? any timeplan for developing the missing parts.
 - Which upstream/downstream open source communities involved in the development? What are their roles, i.e. what functionalities /interface do they provide?
 - Any difficulty/challenges the project is currently facing?
 - Resource issue
 - Multi platform support.
 - O2 DMS ETSI profile, we don't have active contributor form Tacker.
 - Any suggestions to OSC, or O-RAN TSC?
 - Any other information you want to share?
- [\[INF-441\]](#) [\[MultiOCloud\]](#) Develop OKD as alternative O-Cloud platform - ORAN Jira ([o-ran-sc.org](#))
