Date

10 Feb 2020

Attendees

- [John Keeney](#)
- [Martin Skorupski](#)

- [Tracy Van Brakle](#)
- [John Ng](#)
- [Lathishbabu Ganesan](#)
- [Eliza Celenti](#)
- [user-ebe48](#)
- [Sonia Sangari](#)
- [Sandeep Shah](#)
- [Lorraine Welch](#)
- [ojus parikh](#)
- [Chris Lott](#)
- [Alex Stancu](#)
- [Andrea Buldorini](#)
- Some other people joined the call later ... please add yourself ...

Discussion

1. Most recent work has focused on "Amber Maintenance Release" functionality - esp A1 Policy Management Service ("Policy Agent"). See [Release A](#)
2. Ongoing efforts to try ensure convergence between OSC's A1 adapter, and ONAP's A1 adapter.
3. Repos:
 - a. Plan to move A1 simulator/stub to SIM project - agreed with [Alex Stancu](#). Need to ensure committer rights etc.
 - b. Dashboards - need to consolidate NONRTRIC dashboard in existing Portal Repo
4. Dashboards: Currently exists 2 dashboards with some overlapping code/functions. Scope difference is pretty clear though, so both are needed.
 - a. non-RT-RIC (holistic view for A1 Policy management operations across all near-RTRICs, Policy instances, Policy types, etc)
 - b. near-RT-RIC (element management of individual near-RTRICs, stats, xAPP management, etc)
5. Need to examine how to address duplicated code in both functions, and the functional overlap (e.g. view which PolicyTypes are supported by xAPPs, etc)
 - a. Meetings scheduled for this week: [Lorraine Welch](#) [Chris Lott](#) [John Keeney](#) [Patrik Buhr](#) [Martin Skorupski](#) [ojus parikh](#) ...
6. Agreed to cancel next week's meeting due to O-RAN Paris F2F. Week afterward may be cancelled too due to MWC.
7. Discussion about use of JIRA for stats/reports - Not ideal due to different ways of using JIRA - e.g. long running epics for ongoing requirements. Even though its not great it's what we have right now
8. SDNR & A1 adaptor
 - a. John: Don't agree that A1 adapter should be hard-coded into SDNR persona/profile. Of course at deployment/instantiation time any bundles can be included in teh same instance, but this should not be enforced.
 - b. Martin: Current Netconf mediation is quite thin, and most "controller" logic isa actually above SDNC, e.g. in PolicyFramework.
 - c. John: Agree - same with A1. Would like to maintain a loose coupling, with A1/O1/O2 coordination outside/above mediation functions, not in them.
 - d. ... <CUT>

Connection unexpectedly cut due to bridge reuse.

Need to continue the discussion on A1/O1/SDNR etc.
