Date

02 Mar 2020

Attendees

- [John Keeney](#)
- [Martin Skorupski](#)

- [Eliza Celenti](#)
- [Sonia Sangari](#)
- [Sandeep Shah](#)
- [Chris Lott](#)
- [Alex Stancu](#)
- [Patrik Buhr](#)
- [user-ebe48](#)
- Some other people joined the call later ... please add yourself ...

Discussion

1. OAM:
 - a. Discussion about un-closeable JIRA epics - These are mostly based on multi-release requirements from RSAC. Aim to have epics that do not run more across (several) multiple releases. Need to work with RSAC to map requirements into epics rather than take such requirements directly as epics. e.g. OAM-2
 - b. Removal of A1 aspects of Ric Dashboard. OAM-56 All OK.
 - c. OTF: Eliza: Good progress with DMAap VTH
2. NONRTRIC:
 - a. Relevant OSC updates from (non)F2F in Paris
 - i. Request for better feedback/demos from PTLs - per sprint
 - ii. Upcoming RSAC meetings will feature updates and demos from PTLs: NONRTRIC demo at TOC/INT meeting this week.
 - iii. Proposal to use VIAVI simulators for integration tests etc. However O1 support in simulated/emulated functions is not described. This would make OAM/SMO/NONRTRIC functions impossible to demo or test. Clarification requested.
 - b. OTF: Will engage more with OTF developers to help define VTH stubs for NONRTRIC functions, especially PolicyManagementService.
 - c. OTF: Continuing discussions about the need for a VTH to A1Adaptors in addition to PolicyManagementService. OTF connecting direct to A1Adaptors could be used for function-testing the PolicyManagementService. John has an action to edit function/sequence flows for HealthCheck use case to show this, and will try to make progress ASAP.
 - d. Ongoing discussions wrt tight coupling between A1 and O1 controller functions into one controller. Loose coupling preferred but will need steer from ONAP architecture team etc.
 - e. Repos:
 - i. portal/nonrtric-controlpanel Awaiting TOC approval to move A1PolicyManagementGUI functionality from nonrtric repo. Ref OAM-56 above.
 - ii. sim/a1-interface Agreed with Alex to place A1Simulator stub from nonrtric repo into sim repo. Will forward committer proposals for TOC approval.
