

2020-05-05 meeting agenda and minutes

Status update:

- Integration lab progress ([Bin Yang](#))
 - HW is available, FPGA(vista creek) card is also available.
 - iDRAC port of HW server is available, through the virtual media, it could be used to install the iso.
 - Will install the INF deliverables and do the test together with ODU-LOW team.
 - Need verify the real time feature by using the cyclicttest.
 - Need run the test cases provided by ODU-LOW team.
- All the source codes are available at the repo. Currently there are still some bugs need to be fixed.
 - Most of the services had been enabled correctly.
 - Kubernetes and Kubernetes Dashboard are available.
 - Highlighted Issues:
 - After unlock, the drbd service is not stable. (Issue to be opened by [Jackie Huang](#))
 - After unlock, the log files are not existing.

INF-65 - [meta-stx][unlock reboot] syslog-ng cannot redirect logging to the destination anymore
