

A1 Interface

Reference Implementation Based on near-RT RIC

This section documents the details of the O-RAN App SDK which is primarily covering the implementation for near-RT RIC xApps. information about how the O-RAN App SDK will evolve to cover other O-RAN apps can be found [here](#).

- Policy definition happens outside RIC
- xApp specifies supported policy types in xApp descriptor
- xApp receives policy instance creation/deletion via RMR
- Frameworks: "register handler for A1" (now)
