

# ASN.1 Compiler

## Reference Implementation Based on near-RT RIC

This section documents the details of the O-RAN App SDK which is primarily covering the implementation for near-RT RIC xApps.

Information about how the O-RAN App SDK will evolve to cover other O-RAN apps can be found [here](#).

## Description

ASN.1 to C compiler takes the ASN.1 module files (example) and generates the C++ compatible C source code. That code can be used to serialize the native C structures into compact and unambiguous BER/OER/PER/XER-based data files, and deserialize the files back.

## Bronze Release Version

Bronze Release development (master branch) version 0.9.29 (09 Aug 2019)
