Date

06 Jul 2020

Attendees

- [John Keeney](#)
- [Martin Skorupski](#)
- [Alex Stancu](#)
- [Sonia Sangari](#)
- [Kuldeep Negi](#)
- [Chris Lott](#)
- [Maxime Bonneau](#)
- [Himesh Shukla \(HCL\)](#)
- [Vidhu Pandey \(HCL\)](#)
- [Gautam Kumar](#)
- [Manjunath D](#)
- [Marcin Krasowski](#)
- [Pawel Slowikowski](#)
- [Naveen Sankad](#)
- [bujunuri ramanareddy](#)
- [Ting Lu](#)
- [Abhinav](#)
- [HEMANT JHA](#)
- [user-d5bae](#)
- [Lorraine Welch](#)
- Some people may have joined later ... please add yourself ...

Discussion

NONRTRIC:

- [John Keeney](#)
 - Earlier work will be focused in ONAP - especially around upstreaming / converging A1 Adapter & A1 Policy Management Service in ONAP CCSDK / SDNC
 - Epics & Issues now appearing in ONAP CCSDK & SDNC Jira projects
 - Sprint planning still in progress. Epics & stories will appear in OSC JIRA ASAP.
 - Initial Epics/Stories available at <https://jira.o-ran-sc.org/projects/NONRTRIC> (Issues are continuously updated & added)
 - Work in OSC will focus initially on first version of A1 Enrichment Information Coordination Service
 - Will need to adapt INT & TEST parts of NONRTRIC project to accept A1 Adapter & A1 Policy Management Service as downstream dependency from ONAP
 - Examining newly delivered [Application LCM Use Case](#) from AT&T in RSAC. (R1)
 - Will be difficult to identify commonality / alignment between xApp LCM (O2 - WG6) and rApp LCM (NONRTRIC - WG2) - alot of study/prototyping required.
 - Need to focus on avoiding divergence / duplication of work in ONAP.

- Will need to study how to extract bite-sized chunk that we would be achievable in Cherry
- Also examining data job management proposals from AT&T to WG2. (R1)
- [Manjunath D](#) identified a typo in [Developer Guide Docs site \(Latest\)](#) - should state JDK v8 is needed for SDNC (Frankfurt) A1 Controller
 - Will be JDK 11 in "Latest"/master very soon - ongoing work in SDN-R sub-project in SDNC ONAP to update to ODL Sodium & JDK 11.
- [Manjunath D](#) Should we use ONAP [Setting Up Your Development Environment](#) to build SDNC controller parts - Yes.
- [Kuldeep Negi](#) & [Vidhu Shekhar Pandey](#) - looking forward to getting running with contributions in OSC & ONAP - environments up & running now 😊

OAM: ([2020-07-06 OAM Meeting notes](#))

- [Martin Skorupski](#)
 - Update on ongoing activities
 - Working on VES using YANG - demo in coming weeks - [VES goes YES](#).

SIM: ([Alex Stancu](#))

- Short Update - E2 SIM awaiting E2 data.

OTF: ([Eliza Celenti](#))

- Epics planning/prioritisation for Cherry ongoing - starting to firm up now - See RSAC [Contributions](#).

RIC Dashboard ([Lorraine Welch](#))

- No update
