

2020-09-14 Meeting notes - Joint OAM / NONRTRIC SCRUM meeting

NOTE: During the "Daylight Savings Time" changeover periods (US vs Europe vs Asia) the time of the meetings may fluctuate. See the Calendar: (<https://lists.o-ran-sc.org/g/main/calendar>)

Note about daylight savings time

Please note that the weekly OAM/NONRTRIC scrum team meeting will continue on Monday's at 13:00 UTC.

Daylight Savings time changes have now completed for a few months so times are

- **6am PDT | 9am EDT | 13:00 UTC | 14:00 BST | 15:00 CEST | 16:00 EEST | 18:30 IST | 21:00 CST | 22:00 JST**

NOTE:

The Calendar/Meeting Series will be moved to OSC groups.io calendar (<https://lists.o-ran-sc.org/g/main/calendar>) in coming weeks. Please update your calendar subscriptions.

Date

14 Sep 2020

Attendees

- [John Keeney](#)
- [Martin Skorupski](#)
- [Alex Stancu](#)
- [Sonia Sangari](#)
- [Lasse Kaihlavirta](#)
- [Tracy Van Brakle](#)
- [Andrea Buldorini](#)
- [subhash kumar singh](#)
- [Dibas Das Dibas Das](#)
- [Pawel Slowikowski](#)
- [Konrad Baka](#)
- [user-d5bae](#)
- [Patrik Buhr](#)

- Some people may have joined later ... please add yourself ...
- Public holiday in US - some several people could not attend.

Notes:

Meetings will move to Wednesdays at 16:00 UTC from next week. - Same Zoom bridge

NONRTRIC

- ONAP:
 - tasks are now M4 ready (but not yet passed)
 - Thanks to Samsung team especially for help with OOM and CSIT tests
 - Need to add more CSIT - and probably should use robot framework ...
 - Also need to improve commenting & descriptions in JIRA!
 - Need to improve documentation
- OSC:
 - Starting work on A1 Enrichment Information coordination function - will be very simple initially!
 - Need to work on a simple rApp catalog - Cherry reqmnt from RSAC (AT&T)
 - Added to backlog
 - Will likely leverage existing work in ONAP ...
 - Will soon starting testing A1 functions from ONAP
 - All documentation will also need to be updated!
- Cannot work on A1-P v2.0 yet - 60 day IPR cool-off period is not yet complete. Initial code ready but cannot be pushed yet.

- Samsung requesting clarity on how to config with configMap vs Consul etc
 - [John Keeney](#)
 - Configuring using consul was previously supported when A1 Policy Management Service was optionally deployable as a DCAE service in OSC.
Now in ONAP A1 Policy management is deployed as a standalone Service, so Consul is alot more difficult to set up (and would add a deployment-time hard requirement for Consul/DCAE configuration)
When K8S ConfigMaps are used the functionality that would be provided by Consul is also not needed
So, Consul/CBS is still possible but not configured or tested in ONAP - k8s configmap should be used instead.
 - Suggestion ConfigMap does not allow dynamic update in ONAP ... (Note: 23/9/20 Clarified that this works as expected after a short delay)

OAM

- [Martin Skorupski](#)
 - Still struggling with 3GPP copyright issues
- RIC Dashboard: No update
- Mentioned the need to examine test coverage in RIC dashboard
 - [John Keeney](#) Also need to work on test coverage in NON-RT-RIC dashboard ... Of course backend (Java) is easy, but unsure about the graphical parts ...

SIM

- [Alex Stancu](#)
 - E2 SIM: Ron is adding E2 SIM files today (?) so can really make progress now
 - O1 SIM: Need a new JIRA ticket for new VESS version
