Notes:

No meeting next week - Clashing with ONES, O-RAN PlugFest & other activities.

SMO / OAM

- [Mahesh Jethanandani](#)
 - Demo from Santanu of using REST (postman) to connect to RESTCONF interface of test netconf interface for sample functions based on their Yang models
 - Compared with [Martin Skorupski](#) & [Alex Stancu](#) demo of using ODL swagger interface & custom scripts to same RESTCONF interface
 - Tricky to generate the full request & see response - so showing multiple options is a good idea.
 - Add details to wiki to help/encourage people to do some testing of Yang models
- [Konrad Baka](#) Thoughts on packaging for CNFs for ORAN functions in ONAP / OSC ...
 - See <https://wiki.onap.org/display/DW/CNF+deployment+of+O-RAN+Components>

- Currently xApps are deployed as helm charts only
- @all CNF or VNF? or Both? - suggest start with CNF first? Depending if we're talking about a function or a full service - not sure yet. Should be possible to combine VNFs & CNF together?
- Topic needs further discussion ... since next week's meeting is cancelled (ONES, O-RAN Plugfest, etc) we need to find a suitable venue will update when decided or over email

- [Martin Skorupski](#) ~~Due for discussion but not discussed - No time~~
 - [Creating an instance of SDN-R using docker compose](#)

NONRTRIC

- No update as we ran out of time
- [John Keeney](#) Main updates (Not presented):
 - ~~Ongoing prep for ONAP Guillin RC0 for A1 functions~~
 - ~~Demo at ONES next week: "Policy-based RAN Management Using O-RAN's Open Source Non-RealTime RIC (ONAP, ORAN-SC)"~~
 - ~~Demo at PlugFest next week: "Manage A1 policies over A1 interface using functions from ONAP and OSC" (Video/etc will appear here- somewhere: [PF2 North America](#))~~
 - ~~Work ongoing on A1 Enrichment Information Coordination function in OSC~~
 - ~~Status update to O-RAN Alliance WG2: [OSC 2020.09.02 WG2 | OSC NONRTRIC Status JohnKeeney v01.pdf](#)~~

SIM

- No update as we ran out of time
