

2021-03-04 Meeting notes

Date

04 Mar 2021

Attendees

- [Mahesh Jethanandani](#)
- [Martin Skorupski](#)
- [Alex Stancu](#)
- [bhanu chandra](#)
- [JP Lane](#)
- [Kiran Ambardekar](#)
- [Vidhu Shekhar Pandey](#)
- [HariomGupta\(HCL\)](#)
- [Santanu De](#)
- [Shrinivas Joshi](#)
- [John Keeney](#)
- [Tracy Van Brakle](#)

Goals

- Review items from last meeting
 - [Martin Skorupski](#)- state of YANG models. WG4 have published the YANG models as part of the November train. Viavi simulator needs to support these models. Alarms are send as NETCONF notification directly to the SMO. SMO will have to translate this to a VES event and send to the O1-VES interface. [Alex Stancu](#)to show the state of the models, specifically the feature statement. O-DU models defined by O1 WG. But it might not have what is the needed for the Close Looped automation use-case. A small model needs to hand crafted. Viavi needs to do Call Home to the DU. So the O-DU will need to support a Call Home server. [user-165c](#)to tell us about the state of the O-DU YANG model according to [Vidhu Shekhar Pandey](#).
 - [Mahesh Jethanandani](#)- Monitoring solution

Discussion items

Time	Item	Who	Notes
5 min	Agenda bashing	Mahesh Jethanandani	
15 min	State of YANG models	Martin Skorupski	
15 min	Monitoring Solution	Mahesh Jethanandani
