OSC Project roundup:

NONRTRIC ([John Keeney](#))

- No major update.
- Still training & initial prototyping around rApp execution platform - k8s based.
 - Nothing to show yet. Getting closer. Will share in coming weeks.
- ONAP H release - A1 Policy Functions - getting over the line! (Warnings in gating tests, Documentation, etc)

SIM ([Alex Stancu](#))

- No major update.
- Continuing with [Core Infrastructure Initiative \(CII\)](#) [Badging](#) tasks.

OAM ([Martin Skorupski](#))

- Still discussing topology in ONAP: [Abstract Topology Model](#)
 - Also getting interest from optical transport people (in ONAP ?) too!
- O-RAN specs from "November train" now available from O-RAN website
 - Reviewing models with [Alex Stancu](#). Working on CI pipeline testing etc of models ... will revert to O-RAN Alliance
- Preparing O-DU use-case prototype model
 - [Use case driven YANG modules for O-DU](#)
 - Once ready will let [John Keeney](#) know about the (OpenAPI) api to use to manipulate O-DU via OAM Controller (SDN-R) i.e. the NBI for SDN-R - Restconf from the yang file.
- FM
 - Near-RT-RIC xApp alarms? What is it raised alarms? How are they documented?
 - Discussing with O-RU and O-DU about how they expose their FM model?

ONAP - OSC:

- [Swaminathan Seetharaman](#) Can not attend this week 😞
- [Lasse Kaihlavirta](#)
 - How will RIC configurations be examined/discovered? [John Keeney](#) A1-PMS does RIC-ID to RIC-URL mapping. [Lasse Kaihlavirta](#) What will R1 do for this?
 - Will A1 Policy keep alive be part of R1? [John Keeney](#) Can disabled if you wish. [Lasse Kaihlavirta](#) Will this be in R1?
 - [John Keeney](#) R1 is entirely undefined. We just need to wait for discussions to mature in O-RAN Alliance WG2. Spec process has not yet started. Still at the study phase.
- [Vidhu Shekhar Pandey](#) Update on O-DU - ODL testing
 - Tested cut-down SMO test environment. Can manually mount the O-DU-high in SDN-R
 - How to do this using pnfregistration VES message etc.
 - [Martin Skorupski](#) will give sample VES message etc to POST to VES Collector
 - Re [Closed loop use case](#) & [Use case driven YANG modules for O-DU](#)
 - Would like input from [user-165cf](#) & [user-30c9d](#) - Will discuss at RSAC call tomorrow. Ref [RSAC Meetings](#)
- Use case specific O-DU model [Use case driven YANG modules for O-DU](#) - Should we remove the section for du-to-ru-connection . Not planning to have a netconf connection to O-RU. [Martin Skorupski](#) No. Please leave it there.
