Scope

This wiki describes OAM specific test cases according to [3. O-DU Startup](#).

[OAM-192](#) - Getting issue details...

STATUS

Test cases

Message flow number	Test case	Passed	Comment
5, 6, 7, 8, 10	O-DU/https/IPv4/VES:pnfRegistration to message router	☒ 10 May 2021 Martin Skorupski	Checked with RestClient on Message Router
5, 6, 7, 8, 10	O-DU/https/IPv6/VES:pnfRegistration to message router	☒ 10 May 2021 Martin Skorupski	Checked with RestClient on Message Router
9, 11, 12, 13, 14	Create mountpoint based on VES:pnfRegistration and get connected - NETCONF/SSH/IPv4	☒ 10 May 2021 Martin Skorupski	Visible on ODLUX (connected)
9, 11, 12, 13, 14	Create mountpoint based on VES:pnfRegistration and get connected - NETCONF/TLS/IPv4	☒ 10 May 2021 Martin Skorupski	Visible on ODLUX (connected)
9, 11, 12, 13, 14	Create mountpoint based on VES:pnfRegistration and get connected - NETCONF/SSH/IPv6	☒ 10 May 2021 Martin Skorupski	Visible on ODLUX (connected)
9, 11, 12, 13, 14	Create mountpoint based on VES:pnfRegistration and get connected - NETCONF/TLS/IPv6	☒ 10 May 2021 Martin Skorupski	Visible on ODLUX (connected)
25		n/a	automatically done by O-RU NF-Manager (device-manager) in context of O-RU on-boarding Technical problematic, because OTF needs to know credential and network details to subscribe for OAM controller.
26	NETCONF operation <create-subscription/> SSH/IPv4	☒ 10 May 2021 Martin Skorupski	automatically done by O-RU NF-Manager (device-manager) in context of O-RU on-boarding
26	NETCONF operation <create-subscription/> TLS/IPv4	☒ 10 May 2021 Martin Skorupski	automatically done by O-RU NF-Manager (device-manager) in context of O-RU on-boarding
26	NETCONF operation <create-subscription/> SSH/IPv6	☒ 10 May 2021 Martin Skorupski	automatically done by O-RU NF-Manager (device-manager) in context of O-RU on-boarding

26	NETCONF operation <create-subscription/> TLS/IPv	☒ 10 May 2021 Martin Skorupski	automatically done by O-RU NF-Manager (device-manager) in context of O-RU on-boarding
