

Near-RT RIC (D release)

These are the planned versions to be used for the D release (D-release status: [link](#)).

Use the recipe file `RECIPE_EXAMPLE/example_recipe_oran_dawn_release.yaml` from ' `git clone "https://gerrit.o-ran-sc.org/r/ric-plt/ric-dep"` ' to deploy the near-RT RIC platform. This file is aligned with the versions below.

Component (docker image/library /module)	Image in release repo (10002) or in staging repo (10004)	Gerrit review (to be used to recreate image if disappeared from staging)
docker: ric-plt-e2mgr (E2 manager)	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-e2mgr :5.4.17	https://gerrit.o-ran-sc.org/r/c/ric-plt/e2mgr/+6405
docker: ric-plt-e2 (E2 termination)	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-e2 :5.4.9	https://gerrit.o-ran-sc.org/r/c/ric-plt/e2/+6408
docker: ric-plt-submgr	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-submgr :0.7.1	https://gerrit.o-ran-sc.org/r/c/ric-plt/submgr/+6338
docker: ric-plt-rtmgr	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-rtmgr :0.7.8	https://gerrit.o-ran-sc.org/r/c/ric-plt/rtmgr/+6336
docker: ric-plt-a1	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-a1 :2.5.0	https://gerrit.o-ran-sc.org/r/c/ric-plt/a1/+6380
docker: ric-plt-appmgr	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-appmgr :0.5.3	https://gerrit.o-ran-sc.org/r/c/ric-plt/appmgr/+6398
docker: ric-plt-alarmmanager	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-alarmmanager :0.5.10	https://gerrit.o-ran-sc.org/r/c/ric-plt/alarm-go/+6412
docker: jaegeradapter	docker.io/jaegertracing/all-in-one :1.12	
docker: ric-plt-o1	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-o1 :0.5.2	note: 0.5.1 was old release due to some staging vs release issue. https://gerrit.o-ran-sc.org/r/c/ric-plt/o1/+6400
docker: ric-plt-vespamgr	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-vespamgr :0.7.4	https://gerrit.o-ran-sc.org/r/c/ric-plt/vespamgr/+6410
docker: xapp-onboarder (dms_cli)	<code>git clone -b dawn "https://gerrit.o-ran-sc.org/r/ric-plt/appmgr"</code>	
docker: ric-plt-dbaas (database)	nexus3.o-ran-sc.org:10002/o-ran-sc/ric-plt-dbaas :0.5.2	Image is already at release area. https://gerrit.o-ran-sc.org/r/c/ric-plt/dbaas/+6236
docker: influxDB (optional)	docker.io/influxdb :1.8.0-alpine	
docker: mgxapp (optional metrics gateway xApp)	not planned to be released in D release (See RI C-799)	
library: rmr	version 4.7.4 (Apr-27-2021)	
library: mdclog	version 0.1.2 (Jun-22-2021)	
library: ricxfcpp (xapp-frame-cpp)	version 2.3.4 (Jun-23-2021) TODO re-create	https://gerrit.o-ran-sc.org/r/c/ric-plt/xapp-frame-cpp/+6402
library: riclibe2ap	version 1.1.0-1 (Jun-10-2021)	
library: sdl	version 1.2.1-1 (Jun-4-2021)	
library: rnib	version 1.2.0	https://gerrit.o-ran-sc.org/r/c/ric-plt/nodeb-rnib/+6411
module: mdclogpy	version 1.1.4 (Jun-17-2021)	
module: ricsdl (sdl for python)	version 3.0.0 (Jun-10-2021)	
module xapp-frame-py (in pypi = ricxappframe)	version 2.2.0 (Jun-23-2021)	https://gerrit.o-ran-sc.org/r/c/ric-plt/xapp-frame-py/+6399

End-of-release tasks

1. Complete code upload/update

2. Double-check from [Code coverage reports](#) (click on "primary link" in that page) that all **blocker** code smells have been addressed as per RC-5 in [Release criteria checklist template](#)
3. If applicable, release binary artifact(s) such as docker container image(s), or libraries.
 - a. Formal instructions: [O-RAN Developer's Guide to CI Resources and Processes at the LF](#). For container image releases we do check "container-tag.yaml" in the repo and from there you get the latest version of the container (*the expectation is that during development that version is updated as changes are made to the repo*). If it's the same as in the previous release (Cherry) because there were no changes, or because developers forgot to update that one, update it as well. This has to be committed and merged first. As a second step take the version from container-tag.yaml and update that into .../releases/container-release-**ric-plt-e2mgr**.yaml (in two places; in row "version" (skip this if the italics text above applied) and in row container_release_tag) also take the commit Id that is the latest and update that into /releases/container-release-**ric-plt-e2mgr**.yaml. The bold part obviously differs per component.
4. Update references to artifacts in the above table. Also fill in the last column with reference to the gerrit review that can be used to regenerate the artifact.
5. Update release notes: Make sure you have a release summary as per RC-1 in [Release criteria checklist template](#): "every component must update their rst release notes (in the doc subfolder in the repo)". Based on this per-component description, the PTL will create a release summary.
 - a. Release Notes must be published to <https://docs.o-ran-sc.org/en/latest/>
 - b. Instructions for setting up documentation folder for repo: <https://wiki.o-ran-sc.org/display/DOC/Configure+Repo+for+Documentation>
6. After finishing all the above, branch "dawn" (all lower case).
 - a. Repo owners (committers) can create branch.
 - b. There are several ways to create branch. For example do this: Login to web UI <https://gerrit.o-ran-sc.org/r/admin/repos> > Find repo, click on repo name > "Branches" in left panel > "Create New"
