Notes:

Housekeeping:

- **Reminder from previous weeks:**
 - OSC SMO calls now move to its own time slot - Thursdays
 - See OSC RSAC Calendar: <https://wiki.o-ran-sc.org/display/RSAC/calendars>
 - (Note this meeting to open to anyone, including non-ORAN members)
 - We will maintain this slot for ONAP Alignment, and try flag issues/question to/from SMO meetings.
 - See [OSC SMO Project meeting notes](#)
- O-RAN has declared that recording are kept for 2 weeks only. Does this apply to us?
 - Is this a requirement, a privacy issue or a cost issue?
 - Not sure - the recording storage quota that we use is currently full - so we may need to delete old cloud recording?
 - All past recording are also available as files uploaded to the wiki pages - May be a storage issue later, but no plans to delete as yet.

OSC Project roundup:

NONRTRIC (John Keeney)

- Working hard on integration & documentation tasks now for OSC D release
 - Should soon have access to the it/dep
- John Keeney Martin Skorupski Alex Stancu, Felix & Mahesh - Hope we can catch up to figure out our way through the e2e integration tasks for OSC D release
- John Keeney Brief feedback of what happened at OSC TOC call this week: [https://wiki.o-ran-sc.org/display/TOC#ORANSTechnicalOversightCommittee\(TOC\)-20210609](https://wiki.o-ran-sc.org/display/TOC#ORANSTechnicalOversightCommittee(TOC)-20210609) (Minutes not yet updated at time of writing)

SIM (Alex Stancu)

- Simulators are stable & ready to run.

OAM (Martin Skorupski)

- Working on deployment & integration
- Considering a DNS - especially for IPv6 address (E release maybe, if needed)
- Working on docker-compose for integrated deployment of SMO/OAM/SIM/NONRTRIC functions
 - Topology Service:
 - Collaborative work with ONAP Modelling/O-RAN Alliance modelling

O-DU (HariomGupta(HCL))

- Working hard to integrate comments from reviews - reviews merged now.
- Working with Radidys team for API
- Q to Martin Skorupski - How to trigger the edit-conf message?
 - Via the ODLUX UI once mounted
 - Uses the yang models to present the UI
 - HariomGupta(HCL) Seems to be readonly?
 - Can also use VES messages directly
 - John Keeney We also use RESTCONF to trigger those changes via SDNC/ODL NBI for LinkMonitor app implementations (ONAP Policy & Script) (Will find a sample of the PUT operation)
 - Ref script at <https://gerrit.o-ran-sc.org/r/gitweb?p=nonrtric.git;a=blob;f=test/usecases/oruclosedlooprecovery/scriptversion/app/main.py> for sample RESCONF message
 - Release D: Simple script for O-RU & O-DU use case

- [Martin Skorupski](#) will add the RESTCONF log copy
 - [D-Release Integration](#)

ONAP SMO deployment options (Christophe Closset (AT&T) & [Amar Kapadia](#) (AARNA))

- Proposal for an ONAP deployment specific for an ORAN SMO
 - Provide tuned override files in OOM for a standalone ONAP SMO
 - Can provide multiple flavours .. e.g. small/medium etc
 - Current OOM override files are quite out of date & may not be robust.
- [John Keeney](#) Any chance of deploying non-ONAP functions? e.g. NONRTRIC functions in OSC
 - Christophe: Plan to start small with OOM initially (so no ?)
 - Could perhaps deploy non-ONAP functions (e.g. NONRTRIC, simulators etc) as CNFs ?
 - Not sure CNF is appropriate for SMO/NONRTRIC platform functions - Possibly a good idea for simulators etc that are CNFs /xNFs in the RAN
 - O2 (WG) is partly relevant for CNFs (and maybe for apps) - but not for SMO internals
- Please discuss more before officially proposing this PoC in ONAP
