Notes:

Housekeeping:

- **Reminder from previous weeks:**
 - OSC SMO calls now move to its own time slot - Thursdays
 - See OSC RSAC Calendar: <https://wiki.o-ran-sc.org/display/RSAC/calendars>
 - (Note this meeting to open to anyone, including non-ORAN members)
 - We will maintain this slot for ONAP Alignment, and try flag issues/question to/from SMO meetings.
 - See [OSC SMO Project meeting notes](#)
- O-RAN has declared that recording are kept for 2 weeks only. Does this apply to us?
 - Is this a requirement, a privacy issue or a cost issue?
 - Not sure - the recording storage quota that we use is currently full - so we may need to delete old cloud recording?
 - All past recording are also available as files uploaded to the wiki pages - May be a storage issue later, but no plans to delete as yet.

OSC Project roundup:

NONRTRIC (John Keeney)

- As per last week:
 - Working hard on integration & documentation tasks now for OSC D release
 - John Keeney Martin Skorupski Alex Stancu - Will have a quick chat about double-checking integration environment. Looks good!
- John Keeney Brief feedback of what happened at OSC TOC call this week: [https://wiki.o-ran-sc.org/display/TOC#ORANSTechnicalOversightCommittee\(TOC\)-20210616](https://wiki.o-ran-sc.org/display/TOC#ORANSTechnicalOversightCommittee(TOC)-20210616) (Minutes not yet updated at time of writing)
 - Should soon have access to the it/dep
 - Need to push on with D Release task
 - Release E planning will start at RSAC tomorrow.

SIM (Alex Stancu)

- OSC Lab Integration environment is up & running now
 - Includes OAM, ONAP-SMO components, NONRTRIC and SIM components.
 - See [Closed Loop Use Case Testing](#) & <https://gerrit.o-ran-sc.org/r/c/oam/+6238>

OAM (Martin Skorupski)

- Working on deployment & integration & OSC lab setup.
 - See also [Closed Loop Use Case Testing & D-Release Integration](#)
 - See <https://gerrit.o-ran-sc.org/r/c/oam/+6238>
- Some updates required with certs etc when using ONAP Honolulu functions using OOM (& some chart updates)
 - See slack channel <https://onaproject.slack.com/archives/CLF0KRNF/p1623835991081200> ?
- user-4594e: NF-OAM-Adapter making good progress and finally running 😊

O-DU (HariomGupta(HCL))

- OSC Lab & local testing
 - Is integration environment IPv6 only? Working on a small issue with IPv6 now.
- Issue with checking/waiting of SMO is up & running when O-DU comes up (ves:pnfRegistration event may be ignored, or should be sent in a loop? SIM just once? Multiple events is no harm.)
 - May need to a timed loop to keep checking (e.g. every minute?). Not a great solution but prob OK for the Release D use case.
 - In OSC lab the SMO will already be running.
 - If NetConf client is up before O-DU it will keep trying until Netconf port is open.
 - (Best to only open the port when the O-DU is ready? Best to send ves:pnfRegistration event only when O-DU is up?)
 - Should discuss in RSAC.
 - ... may need to do some more testing of these edge cases
- Ongoing discussion over email about how OTF starts (configures?) the O-DU high.

ONAP SMO deployment options (Christophe Closset (AT&T) & Amar Kapadia (AARNA))

- REF: Last week Proposal for an ONAP deployment specific for an ORAN SMO
 - Christophe not available to join this week - Hopefully we can discuss a little more next week.
 - Ref: <https://jira.onap.org/browse/REQ-887>
 - (After the call ended: Martial: Further discussions for this ONAP PoC could happen at this call? Will be a few weeks before this proposal is presented to ONAP Arch. & Req committees etc, then ONAP TSC?)
