Notes:

Housekeeping:

- **Reminder from previous weeks:**
 - OSC SMO calls now move to its own time slot - Thursdays
 - See OSC RSAC Calendar: <https://wiki.o-ran-sc.org/display/RSAC/calendars>
 - (Note this meeting to open to anyone, including non-ORAN members)
 - We will maintain this slot for ONAP Alignment, and try flag issues/question to/from SMO meetings.
 - See [OSC SMO Project meeting notes](#)

OSC Project roundup:

NONRTRIC (John Keeney)

- OSC D Release done - Just need a final check in documentation etc for branch links, version numbers, tags etc..
- Hoping to have a proposal on rApps & R1 in coming weeks.

SIM (Alex Stancu)

- Release is ready. Just need to do the release jobs.

OAM (Martin Skorupski)

- Double checking versions & urls - ref discussion on nexus below
- Looking reqmnts for E release

O-DU (HariomGupta(HCL))

- Martin Skorupski .. confirms IPv6 & integration working on OSC lab.

Update on OSC Nexus vs ONAP Nexus: (Alex Stancu)

- Confusion exists with differences between nexus repos in OSC vs ONAP.
 - OSC: <https://wiki.o-ran-sc.org/display/ORAN/O-RAN+Developer%27s+Guide+to+CI+Resources+and+Processes+at+the+LF> (Search for "nexus")
 - ONAP: <https://wiki.onap.org/display/DW/Required+Tools#RequiredTools-Server-BasedToolsandRepositories>
 - All urls/port numbers need to be changed & re-tested after release - snapshot versions disappear after 30 days.
 - ONAP has a nice solution by using port 10001 for both staging & release.
- Suggestion to ask LF to create a common repo/proxy that provides artifacts across LF projects
 - Need to contact Trishan de Lanerolle to ask advice re OSC
 - @Christophe / Alex Stancu / Martin Skorupski will follow up in ONAP.
- @Christophe: Suggest always using Release versions in helm charts - then use overrides etc to test staging/snapshot versions

ONAP SMO deployment options (Christophe Closset (AT&T) & Amar Kapadia (AARNA))

- Ref: to last 3 meetings.
 - <https://lists.onap.org/g/onap-meetings/viewevent?repeatid=37969&eventid=1192141>
 - <https://wiki.onap.org/pages/viewpage.action?pageId=103422272>
 - <https://jira.onap.org/browse/REQ-887>
- Ref: Friday meeting Minutes & Recording from last week : <https://wiki.onap.org/display/Meetings/2021-07-02+Meeting+notes>
- @Christophe:

- Request to OOM/ONAP to provide a repo for built helm charts in nexus ... ongoing.
- Demo from last weeks shows a prototype of this in github - drawing charts from both ONAP & OSC (via git submodule) - built & stored in local repo.
 - Local repo & git submodule & build can be removed if ONAP and OSC makes charts available publicly.
 - A simple overarching chart / override can then use/fetch charts from both OSC & ONAP - to try out some use cases.
 - Ping @Christophe or @Gervais-Martial Nguoko (AT&T) to get access.
- (John Keeney Also asked about getting a helm chart repo for OSC. <https://lists.o-ran-sc.org/g/discuss/message/331>)

ASD & O2 in ONAP

- (Timestamp 22:40 in recording)
- @Byung gave a brief summary of ongoing work / proposal in ONAP for ASDs for CNF orchestration in ONAP. Input from @Fred also.
 - <https://wiki.onap.org/display/DW/O-RAN%3A+ASD+solution>
 - <https://wiki.onap.org/display/DW/Application+Service+Descriptor+%28ASD%29+and+packaging+Proposals+for+CNF>
 - <https://wiki.onap.org/display/DW/CNF+Orchestration+Functional+Architecture>
 - Goal for a simplified version of SOL001 CNF descriptor & deployment / onboarding - Currently very complicated & duplicated info in helm chart.
 - O2 (SMO-O-Cloud) is still not settled. Currently working with SOL004 CSAR package to SDC then into repository for Orchestrator to use.
- @Fred This is still all at proposal stage. An alternative SOL001 proposal is also under consideration / ongoing.
- Work / Discussions still at a very early stage ... deliverables for Istanbul still in flux. Will also update again when O2 gets clearer.
- Pawel Slowikowski Any plan to fully support ASD format in SDC etc ... e.g. in Portal etc
 - @Byung Yes. A lot of work to do.
 - Push to get the work on ASD grounded first (Istanbul).
 - Re SDC/UI - Yes, but it will likely take some time to get this through SDC etc. Hopefully can reuse a lot of the NSD work is reusable. But all still very early.
- Aiming for alignment with O-RAN.
 - @Fred Note again, alternative proposal from Verizon will be discussed in WG10 next week.

Not Discussed - for next week : ONAP Requirements Subcommittee

- Re Email from Alla: <https://lists.onap.org/g/onap-requirements-sub/message/1985> Timo Perala @NK Shankar
 - Will follow up next week
