

# 2019-08-12 Meeting notes - Joint OAM / NONRTRIC SCRUM meeting

## Date

12 Aug 2019

## Attendees

 JK	John Keeney (Ericsson) (Me)	 
 WO	WG One (Host)	 
 MS	Martin Skorupski	  
 D	Dongho (ATT)	 
	19089012339	
 W	WuJie(CMCC)	 
 BO	Björn on Mac	 
 B	Bya	 
	Chris Lott AT&T	 
 JS	Jun Song(Samsung)	 
 LC	lixiang cmcc	 
 WO	WG One	 
 Y	yangjiaolong-cmcc	 
 RJ	Rittwik Jana (AT&T)	
 TV	Tracy Van Brakle

## Discussion

- Brief roundtable intro from participants who had not joined previous calls.
- John: Update from NONRTRIC:

- Gerrit repo <https://gerrit.o-ran-sc.org/r/admin/repos/nonrtric> and JIRA site <https://jira.o-ran-sc.org/browse/NONRTRIC> set up
- Planning ongoing re candidates for NONRTRIC controller implementation - SDNC based component looking most favourable
- Action: Need to coordinate with [Tommy Carpenter](#) [Chris Lott](#) [John Keeney](#) about RIC dashboard & A1 mediation scope in NONRTRIC
- Martin: Update from OAM
  - Facilities set up in OSC continuing ...
  - Jump straight into discussion on slides ... see next ...
- Martin, All: Target/Reference architecture - Integration with ONAP - based on diagrams used in WG documents etc
  - Draft Slides

- Focus on Slide 5 - clearest picture
  - Are we only using REST for A1? - Yes ... except maybe for A1-EI part - may use a streaming interface - no decision made yet.
    - Action: [John Keeney](#) Need a couple of sentences about why A1 uses REST on wiki
  - Should we split out constituent parts of A1? - Not yet ... perhaps wait until A1-EI is a bit clearer.
  - What is O1\* interface .... ? Action [Martin Skorupski](#) - David Kinsey is the best guy to ask.
  - May need to consider non-event-bus NBIs between components in the OAM space - In practice these non-event (e.g. REST, streaming etc) interfaces will be needed, but would just overly-complicate the diagram.
  - Does CDS etc need to be included. Or APPC etc? ... Probably. Will become clearer, esp when O1\* interface is a bit clearer.
  - Tracy: Reminder about call for demos for ONS and MWC (others?).
  - Dongho: Have we plans/procedures in place for upstreaming changes back to ONAP? - Not yet. Discussion/Planning ongoing.
    - Good potential to engage with ONAP 5G usecases for ONAP Frankfurt - still time to engage with Frankfurt planning.
  - Action: Could [Tommy Carpenter](#) [Chris Lott](#) please present a short update on the A1 parts of the NearRTRIC dashboard etc next week? - Yes.
- Call cut short at T+58minutes due to bridge reuse.

## Action items

- Need to coordinate with Tommy Carpenter Chris Lott John Keeney about RIC dashboard & A1 mediation scope in NONRTRIC. Organise call to discuss further
- John Keeney Need a couple of sentences about why A1 uses REST on wiki
- Clarify what is O1\*: Martin Skorupski - David Kinsey is the best guy to ask.
- Tommy Carpenter Chris Lott Present a short update on the A1 parts of the NearRTRIC dashboard etc next week.
