

NONRTRIC (E-Release)

Note:

This page is a snapshot of information taken from the page: [NONRTRIC - Developer Guide - Release E - Run](#). Please see that [NONRTRIC - Image names and tags](#) for the most up to date version.

Images

The images used for running the Non-RT RIC can be selected from the table below depending on if the images are built manually (snapshot image) or if release images shall be used.

More detail on each component / image can be found at [NONRTRIC - Release E](#)

In general, there is no need to build the images manually unless there are code changes made by the user, so release images should be used. Instruction on how to build all components, see. [NONRTRIC - Developer Guide - Release E - Build](#).
