- *We will maintain this slot for ONAP Alignment, and try flag issues/question to/from SMO meetings.*
- *See [OSC SMO Project meeting notes](#)*

OSC Project roundup:

News from OSC TOC call this week

- [https://wiki.o-ran-sc.org/display/TOC#ORANSTechnicalOversightCommittee\(TOC\)](https://wiki.o-ran-sc.org/display/TOC#ORANSTechnicalOversightCommittee(TOC))
 - [E-maintenance Release](#)
 - [Some O-DU-High functions ready for release](#)
 - [NONRTRIC will try get ODU Slice Assurance use case extended to work with this](#)
 - [\(David Kinsey Issues with Bedminster lab ... so this might be delayed\)](#)

NONRTRIC ([John Keeney](#))

- [E-Maintenance Release](#)
 - [A1-Policy Management Service](#)
 - [Removing deprecated V1 A1-PMS API & CBS/Consul configuration](#)
 - [Removing capability to configure using ONAP CBS/Consul](#)
 - [Couple of typos/Bugs etc - especially version numbers in test/integration charts](#)
 - [Updated 3PPs](#)
- [Proposal: Splitting gerrit/repo contents across multiple repos](#)
 - [Request / Justification to OSC TOC](#)
- [David Kinsey](#) [What would rApp descriptor look like?](#), used during registration, describing required/provided service, required/provided data etc.
 - [WG10 needs to move forward on this re. App LCM, requested by WG2 to present a proposal for rApps.](#)
 - [OSC NONRTRIC likely has opinions](#)
 - [Overlap between packaging & modelling - discussions ongoing](#)
 - [Where would this information go in the model?](#)
 - [Already have some input from WG6](#)
 - [Need to be careful about difference between CNF, Microservice, xApp, rApp etc. e.g. extend ASD descriptor \(but ASD focuses just on K8S as yet\)?](#)

- OSC NONRTRIC approach 'til now has been to focus on App LCM & management post-onboarding - leveraging ONAP Control Spec - starting at the 'bottom'
 - Need to work up the chain, while WG10 team seems to be working from opposite direction re Common Apps ... still need to meet in the middle.

SIM (Alex Stancu)

- No update
- No Maintenance Release

OAM (Martin Skorupski)

- No Maintenance Release issues
- **blocked** URLDCAEGEN2-3024 - Support of values with 'oneOf' types. CLOSED
 - <https://gerrit.o-ran-sc.org/r/c/scp/oam/modeling/+7581/1/data-model/oas3/experimental/o-ran-sc-du-hello-world-pm-streaming-oas3.yaml>

O-DU (Hariom Gupta Vidhu Shekhar Pandey)

- No update
- **David Kinsey** : Likely need to extend O1 data reporting schema etc (Aligning with 3GPP)

RSAC/SMO (David Kinsey)

- RSAC (**David Kinsey**) F-Release Requirements:
 - Want OTF scripts for releases / integration tests (from each project)
 - Each project needs to provide OTF inputs
 - Will shorten release overhead
 - Need a combination of OTF & the Integration team's work on PythonSDK for scripts/overrides etc to roll use-case-specific integration environment setup (Christophe & Sebastien)

OSC Integration / INT (James Li)

- See above (RSAC) re use of OTF for Integration tests / release
- NONRTRIC team to update **James Li** for any maintenance release updates (e.g. versions etc.)

O-RU/O-DU Front-haul Recovery (Hello World) rApp not working

- Endpoint used by rApp (/rests/data/network-topology:network-topology/topology=topology-netconf/node=[O-DU-ID]/yang-ext:mount/o-ran-sc-du-hello-world:network-function/du-to-ru-connection=[O-RU-ID]) is deprecated & will be removed.
 - Updated in E-Release with O-DU Slicing use case updates
- rApp & test stubs needs to be updated
 - e.g. Python Script version: <https://gerrit.o-ran-sc.org/r/gitweb?p=nonrtrc.git;a=blob;f=test/usecases/oruclosedloopprecovery/scriptversion/app/main.py>
 - Ref: [NONRTRIC: O-RU Fronthaul Recovery usecase](#) & [NONRTRIC: Control Loops for O-RU Fronthaul Recovery usecase](#)
- Integration environment for this use case is currently broken ...
- **John Keeney** Will work on this immediately ... hopefully fixed by E-Maintenance
 - [Martin Skorupski](#) [Alex Stancu](#) [John Keeney](#) [Xue Gao](#) will discuss offline

LFN DTF Presentation: "RAN Simulation for ONAP and OSC Use Cases"

SMO Integration Charts (Sebastien Determe)

- E(-Maintenance)-Release Testing continues - v. nearly all working now.
- **Gervais-Martial Nguoko** : Is this work still aligning with OSC goals?:
 - Probably need align a little more with OTF ... but still the right direction

ASD Orchestration

- (@43:00 in recording)
- **David Kinsey** PoC in ONAP for ASD Orchestration. Would be good to keep aligned.
 - When would be the right time to test/integrate/reuse/leverage in OSC ?
 - Best to reuse ONAP work, not re-invent
 - Need to examine how much other ONAP functionality is needed if reused in OSC (e.g. SDC, SO, etc)
- Interesting to see the overlaps/requirements etc with multiple approaches for CNF-Orchestration & App-Orchestration are all examined
 - VNFs, CRDs, ASDs,
- Would be good to get input from the ONAP PoC team.
- **John Keeney** Ref discussions at LFN DTF on ASDs & ASDs in ONAP:

- <https://wiki.lfnetworking.org/display/LN/2022-01-12+-+ONAP%3A+Application+Service+Descriptor+%28ASD%29+for+K8s+NFS>
 - <https://wiki.lfnetworking.org/display/LN/2022-01-12+-+ONAP%3A+ASD+and+Application+Onboarding+and+LCM+Orchestration>
- [David Kinsey](#) Will create a wiki page to identify dependencies, opportunities, etc.
 - See also discussions in WG10 AppLCM (members)
- Would be best to have use cases to drive forward discussions.

ONAP Use cases etc ([N.K. Shankaranarayanan](#))
