Recording

The recording for this session can be found [here](#).

Notes

- [Bin Yang](#) presented his slides on the CNF implementation over the O2 interface. Slides of the presentation and video demo can be found [here](#) and [here](#).
- Yuya Kono had some additional slides on expectations from NFVO (SMO). Made clear that while SMO has support for CSAR.zip package, and its ability to determine that it is a VNFD or a CNF package, it is expected that a separate contribution would have to be brought forth to then read the package further.

Goals

- F-release planning
