

Release criteria checklist - Release F

This page contains a table with criteria and some notes on what the PTL and committers need to check as part of release preparation. It is influenced by CII badging criteria [CII status: near-RT RIC](#).

Release Criteria (RC) headline	Criteria details/references
RC-1 PTL: Check that we have a (a) release summary. Committers: (b) check that release notes are updated in RST file in gerrit.	OK PTL created this (a) summary (under "Achieved F release highlights = high-level release notes" in F release) as per copy of (b) per-component release notes (see version 2 of attachment to this page) and as per JIRA items that we marked as "done" (link).
RC-2: Check that we have all fixed security bugs listed in release notes	OK As of 2021-05-18, there were no security bugs reported as per this filter .
RC-3: Save one-time snapshots of some reports	OK (1) The project MUST acknowledge a majority of bug reports submitted in the last 2-12 months (inclusive); the response need not include a fix (link): 7 open bug reports since E release ((I assume the ones that are closed are handled well)). All 7 have been discussed in the project meeting. OK (2) The project SHOULD respond to a majority (>50%) of enhancement requests in the last 2-12 months (inclusive): link . I am not aware of external feature request raised towards near-RT RIC. Instructions are updated here under "New feature requests": Tools (mailing list, JIRA, Gerrit) OK (3) The project's initial response time for any vulnerability report received in the last 6 months MUST be less than or equal to 14 days: No vulnerability reports received (see filter). OK (4) code coverage report from last meeting minutes - meeting minutes from 2022-06-07 contain the summary. The report snapshots are in version 5 of coverage.zip in the attachments of this wiki page: Code coverage reports
RC-4: Check (from meeting notes) that we checked for all L and XL commits that they include unit tests	OK This was done on 2021-12-21, 2022-02-01, 2022-03-01, 2022-03-15, 2022-03-29, 2022-04-12, 2022-04-26, 2022-05-11, 2022-06-07
RC-5: Check that "blocker" code smells in Sonatype have been addressed	OK Check Sonatype report export and store that export into wiki page: The report snapshots are in version 5 of coverage.zip in the attachments of this wiki page: Code coverage reports
RC-6: Check that all components have a release branch created.	OK Check done ("git branch --list -a" ... remotes/origin/f-release ...)
RC-7: Check that image list has been created and same images are referred to in ric-dep RECIPE_EXAMPLE	OK Near-RT RIC (F release)
RC-8: do we have a demo video on deploying RIC and a demo xapp?	OK see at the beginning of the demo page
