

# Release criteria checklist - Release G

This page contains a table with criteria and some notes on what the PTL and committers need to check as part of release preparation. It is influenced by CII badging criteria [CII status: near-RT RIC](#).

| Release Criteria (RC) headline  | Criteria details/references  |
|---|--|
| RC-1 PTL: Check that we have a (a) release summary. Committers: (b) check that release notes are updated in RST file in gerrit. | <b>OK</b> PTL created this (a) summary (under "Achieved F release highlights = high-level release notes" in <a href="#">F release</a> ) as per copy of (b) per-component release notes (see version 1 of attachment to this page) and as per JIRA items that we marked as "done" ( <a href="#">link</a> ).   |
| RC-2: Check that we have all fixed security bugs listed in release notes  | <b>OK</b> As of 2022-12-13, there was only one security bug reported as per this <a href="#">filter</a> : RIC-942. The bug has been fixed.   |
| RC-3: Save one-time snapshots of some reports   | <p><b>OK</b> (1) The project <b>MUST</b> acknowledge a majority of bug reports submitted in the last 2-12 months (inclusive); the response need not include a fix (<a href="#">link</a>): 1 still-open bug report since F release ((I assume the ones that are closed are handled well). The one has been discussed in the project meeting.</p> <p><b>OK</b> (2) The project <b>SHOULD</b> respond to a majority (&gt;50%) of enhancement requests in the last 2-12 months (inclusive): <a href="#">link</a>. I am not aware of external feature request raised towards near-RT RIC. Instructions are available under "New feature requests" in <a href="#">Tools (mailing list, JIRA, Gerrit)</a></p> <p><b>OK</b> (3) The project's initial response time for any vulnerability report received in the last 6 months <b>MUST</b> be less than or equal to 14 days: One vulnerability report received and fixed on same day (RIC-942, see also git log for sdlgo) (see <a href="#">filter</a>).</p> <p><b>OK</b> (4) The report snapshots and the code coverage report (text file) are in version 6 of coverage.zip in the attachments of this wiki page: <a href="#">Code coverage reports</a></p> |
| RC-4: Check (from meeting notes) that we checked for all L and XL commits that they include unit tests                          | <p><b>OK</b> This was done on 2022-08-16, 2022-09-13, 2022-09-27, 2022-10-11. Additionally these commits are in the release, but we will only check this formally in the project meeting next year:</p> <p><b>OK</b> <a href="https://gerrit.o-ran-sc.org/r/c/ric-plt/ricdms/+9568">https://gerrit.o-ran-sc.org/r/c/ric-plt/ricdms/+9568</a></p> <p><b>OK</b> <a href="https://gerrit.o-ran-sc.org/r/c/ric-plt/xapp-frame-cpp/+9501">https://gerrit.o-ran-sc.org/r/c/ric-plt/xapp-frame-cpp/+9501</a>, likely test cases being added by <a href="https://gerrit.o-ran-sc.org/r/c/ric-plt/xapp-frame-cpp/+9973">https://gerrit.o-ran-sc.org/r/c/ric-plt/xapp-frame-cpp/+9973</a> (under review).</p> <p><b>OK</b> <a href="https://gerrit.o-ran-sc.org/r/c/ric-plt/a1/+9994">https://gerrit.o-ran-sc.org/r/c/ric-plt/a1/+9994</a></p> <p><b>OK</b> <a href="https://gerrit.o-ran-sc.org/r/c/ric-plt/a1/+10066">https://gerrit.o-ran-sc.org/r/c/ric-plt/a1/+10066</a> (config files related to testing)</p> <p><b>OK</b> <a href="https://gerrit.o-ran-sc.org/r/c/ric-plt/a1/+10070">https://gerrit.o-ran-sc.org/r/c/ric-plt/a1/+10070</a> (documentation)</p>   |
| RC-5: Check that "blocker" code smells in Sonartype have been addressed   | <b>OK</b> Check Sonartype report export and store that export into wiki page: The report snapshots are in version 6 of coverage.zip in the attachments of this wiki page: <a href="#">Code coverage reports</a>  |
| RC-6: Check that all components have a release branch created.  | <b>OK</b> Check done ("git branch --list -a" ... remotes/origin/f-release ...)   |
| RC-7: Check that image list has been created and same images are referred to in ric-dep RECIPE_EXAMPLE                          | <b>OK</b> <a href="#">Near-RT RIC (G release)</a>  |
| RC-8: do we have a demo video on deploying RIC and a demo xapp?   | <b>OK</b> see at the end of the <a href="#">demo page</a>  |
