

# Code coverage reports

The latest code coverage report for all RIC platform components can always be found with these links: [primary link](#) (all except "com" logging library components), [remaining-components-link](#) (com-golog, com-log, com-pylog).

Every once in a while the PTL creates an export of the reports. These reports are always stored as "coverage.zip" in the [attachements](#) of this page. Older versions of the same attachment refer to older versions. This can be used, e.g., to check for deteriorating test coverage levels.

As of 2023-05-23 the following components are missing in the report:

1. ric-plt/a1
2. ric-plt/alarm-cpp,
3. ric-plt/alarm-go (not running for a long time),
4. ric-plt/libe2ap,
5. ric-plt/e2mgr (not running for a long time),
6. ric-plt/nodeb-rnib,
7. ric-plt/o1,
8. ric-plt/ric-dep,
9. ric-plt/ric-test,
10. ric-plt/sdlpy,
11. ric-plt/sdlgo (not running for a long time)
12. ric-plt/utills.
13. ric-plt/rtnmgr (not running for a long time)
14. ric-plt/e2 (not running for a long time)
15. com/golog (not running for a long time)
16. com/pylog (not running for a long time)
17. Also ric-plt/jaegeradapter is missing, but we probably abandon that component. So no need to spend time on it.

Latest report as of 2023-05-23: **The list below is only working reports // Anybody volunteering to work with LF on making the code coverage CI to work again (there's still the old JVM version)**

1. com/log 82,6 // 1 major bug (2023-12-14)
2. ric-plt/appmgr 19,3 // 1 major bug (2023-12-13)
3. ric-plt/dbaas 0,0 // 0 blocker bugs (put 2 detected in unit testing code) (2023-12-13)
4. ric-plt/lib/rmr 86,2->85.7 // no bugs (2023-12-12)
5. ric-plt/sdl 69,2 // no bugs (2023-12-08)
6. ric-plt/submgr 51,2->51,5 // no bugs (2023-12-13)
7. ric-plt/tracelibcpp 0,0 // 1 medium bug (2023-12-12)
8. ric-plt/tracelibgo 96,2->0 //0 bugs (2023-12-12)
9. ric-plt/xapp-frame 0,0 // no bugs (2023-12-13)
10. ric-plt/xapp-frame-cpp 95,5 67.1 (already during G release) // no blocker bugs (2023-11-01)
11. ric-plt/xapp-frame-py 35,0 // 2 major bugs (2023-05-12)
