

# 2023-06-20 Release H

See calendar entry for here: <https://lists.o-ran-sc.org/g/main/calendar>

A recording of the meeting is available as **Zoom recording** (session was Jun-20 (3pm CET - 4pm CET))

**Demo on how to deploy the near-RT RIC, compile and connect the E2 simulator, compile the hello-world go xapp and how use the dms\_cli to deploy it:**

- The [presentation video](#) and a [single-slider](#) and the [command list](#) used in the demo

**Near-RT RIC platform (we might change the order of demos in the beginning of the meeting)**

- 5 min dynamic change of log level in E2Mgr (Rimjhim)
- RICDMS integration with AIMLFW "custom onboarding" (Subhash)
- 20 min RIC deployment (Thoralf) - this is the same as the direct link to the "how to deploy" video above. It was played as last video in the Zoom recording.
- Demos copied from same-day O-RAN face-to-face sessions (will not be repeated in this demo session)
  - RIC E2 subscription delete required (starting at 00:49:10 in [\[oranfacetofacesession\]](#)) (Gunja)
  - E2 reset from E2 node to RIC (starting at 01:04:40 in [\[oranfacetofacesession\]](#)) (Naman)
  - near-RT RIC A1 policy status notifications (starting at 01:11:20 in [\[oranfacetofacesession\]](#)) (Prashant)

**Near-RT RIC xApp project**

- hello-world xapp in Rust (Abhijit)
